

Save energy. Grow profits. Build a better brand.
Make the world a better place.

Engineered Energy Savings

3fficient engineers utility cost savings and other incentives into our client's business, people and brand.

By doing this, we help businesses become more profitable, productive and sustainable while decarbonizing the built environment. This has enabled us to save our clients over \$1 Billion while removing over 1 million tons of carbon from the air we all share.

Supply Chain Savings.
 uncover utility & tax savings, rebates & incentives

O&M Savings.
 free tune-ups and A.I. for efficiency & comfort

Capital Savings.
 free upgrades that crush utility bills

Paid From Savings

Achieving results is easy with 3fficient.

Whether you just want your utility bills checked, a facility tune-up or ready to get off the utility roller coaster altogether, 3fficient makes it easy and risk free to get results.

Proven Results for 25+ years

Corporate

"You saved us \$200,000/yr. With our modest pre-tax profit margin, that's the same as generating over \$4,000,000 in new revenue every year! That also increases our company valuation by \$1,000,000. Wow!" - Gary G, CFO

Education

"This project has not only made our buildings more comfortable, the learning experience has improved dramatically and allows us to illustrate renewable energy, energy efficiency and energy management first hand." - Dr. Jean Lecuyer, GCCD

Government

"We were really pleased how 3fficient educated us about energy efficiency, explored many options, came up with great "out of the box" solutions, and then walked us through the whole process." - Larry Watt, Encinitas

Healthcare

"You guys sure turned our master planning upside down (in a positive way). It looks like we'll be a lot more efficient and provide service much more reliably than we have in the past and save more money than each year before." - Mark Swanson, AHC

Our Clients

Building a sustainable future together

Building more sustainable brands.
