

Grid Alternative

Energy on your terms. Not theirs.

Abnormal is the new normal

The 2018 fire season changed everything. PG&E equipment started the Camp fire killing 86 people and destroying 14,000 homes. From now on, utilities can either: Turn off the grid, or face potential criminal liability for future deaths. State utilities are now compelled to turn off the grid during windy days.

How long can you last without power?

PG&E, SCE, SDG&E and others will be shutting off the grid to prevent wildfires. California Public Utilities Code § 399.2 gives utilities the authority to shut off power in emergency situations whenever necessary to protect public safety, *for as long and as often as needed*. Customers with solar, without *islanding* energy storage, will still be affected.

You have a better option

A 3fficient Microgrid protects you from power outages that solar alone cannot do. A 3fficient microgrid is guaranteed to protect you from blackouts.

Unlike backup generators, 3fficient Microgrids range from 100% containerized solutions to custom integrations that follow your daily operations. So why add an expensive backup generator when you can have cheaper, more reliable power with the utility as a backup?

Why 3fficient Microgrid?

- ✓ Free up capital, reduce debt
- ✓ Improve budget and financials.
- ✓ Avoid costly outages and save lives.
- ✓ Stabilize and reduce operating expenses.
- ✓ Contact us to see how we can save your biz in ways you never expected.

What we do

3fficient has been engineering and commissioning green energy solutions for over 25 years. Today, we are an advanced microgrid integrator and energy solutions provider.

By hosting a 3fficient microgrid, you'll get efficiency enhancements and access to advanced energy management to save even more while making your facilities more efficient, productive and sustainable.

Partners

Tier 1 manufacturers of renewables, energy storage, A.I., efficiency and other solutions. Capital partners, federal and state funds, *green* investors and others.

Markets we serve

Delivering Lifecycle Value from Origination through Operation
